  Note:
  I worked as an intern under Human resource, where I've completed a few projects. It was a 5-month internship. I learned many things a Multinational corporation's HR policies and how things work under it.
  Worked in New Holland: CNH industrial. It was a 3-month internship where I gained much real-life experience of working in an MNC.

Projects:

1. **My GBU App**
   University student application with many useful features like: Timetable, Notices, University Map, Admissions, etc
   Repo: https://github.com/great-aryan/MyGBU-app

2. **Wcare App**
   Focused on Women Security, Companion app for a security Pendent (hardware). Useful in emergency situations and contacting relatives and Distress numbers.

3. ***Krishi Samadhan App***
   Based on machine learning model, used to determine various diseases of crops by capturing the images. Helpful in finding cures and causes of disease od plants.
   Repo: https://github.com/great-aryan/KrishiSamadhan

4. **Technoficition Website**
   Event oriented website for displaying information about event, registration button, winner and contact details of organisers.
   Repo: https://github.com/great-aryan/technofiction
   Deployment: https://technofiction-aryan.netlify.app/

5. **Tech Trivia Website**
   Event oriented website for displaying information about event, registration button, winner and contact details of organisers.
   Repo: https://github.com/great-aryan/tech-trivia
   Deployment: https://tech-trivia-aryan.netlify.app/

6. **Research by Learning Hackathon Website**
   We created a website for a competition called creators web designing contest, it's an Event oriented website for displaying information about event, registration button, winner and contact details of organisers.
   Deployment: https://creators-rblh.netlify.app/
   Repo: https://github.com/great-aryan/Creators-rblh

7. **Calculator.exe**
   I made a calculator when I was in 6th standard: 2015 using C# and Visual Basic. I made this standalone-windows-executable calculator in Visual Studio Community 2010.
   Repo: https://github.com/great-aryan/MyFirstCalculator
